

# Cast Iron Globe Valve DIN Standard

This globe valve is made of cast iron and designed according to DIN 86251 standards. It is suitable for use with water, oil, and air.

## Product Overview

### Industrial Cast Iron Globe Valve

This DIN standard cast iron globe valve is engineered for reliable flow control in industrial fluid systems. Designed for durability and performance, it features a robust cast iron body and bonnet with stainless steel internal components for enhanced corrosion resistance. This valve is suitable for a wide range of media including water, oil, and steam, making it a versatile choice for various piping applications.

## Technical Standards

Design Standard	DIN 86251
Face to Face	DIN 3202 F1
Flanged End	DIN 2533 / 2501
Test & Inspection	DIN 3202

## Performance

### Operating Temperature

**100 °C**

Water Max Temp

**200 °C**

Steam/Oil Max Temp

### Suitable Media

Water, Oil, Steam, Gas

## Construction Materials

### Material Composition

Component	Material
Body & Bonnet	Cast Iron
Disc	Cast Iron + Brass
Seal Ring	Cast Brass
Stem	Stainless Steel
Stem Nut	Cast Brass
Gasket & Packing	Graphite

## Operation

Operator	Handwheel
