

Cast Iron Medium Pressure Gas Stove Burner

This cast iron gas stove burner is designed for medium-pressure commercial use. It is built for efficiency and reliability in professional kitchen environments.

Overview

Detailed view of the heavy-duty cast iron burner head featuring a multi-ring design for efficient heat distribution.

High-Performance Commercial Gas Burner

This heavy-duty cast iron burner is engineered for medium-pressure gas systems, providing high heat output for demanding commercial kitchen environments. Its robust construction ensures long-lasting durability and even heat distribution, making it ideal for restaurants and catering services. The multi-ring design allows for precise flame control across various cooking applications.

Technical Specifications

Pressure Rating

Medium Pressure

Key Features

- Multiple gas inlets
- Adjustable valves for optimal flow
- Efficient combustion system
- Robust valve assembly for safety

Material

Heavy-duty Cast Iron

Gas Compatibility

Natural Gas, Propane

Burner Design

Multi-ring design for precise flame control

Logistics & Service

Estimated Lead Times

Order Quantity	Lead Time (Days)
Small Quantity	7-15 Days
Large Quantity	Approx. 30 Days

Shipping Methods

- Sea Freight
- Air Freight
- Express (EMS, UPS, DHL, TNT, FEDEX)

Manufacturing Services

OEM Customization Available
