

Cast Iron Pipe Fittings

These cast iron pipe fittings are manufactured according to EN877 and DIN19522 standards. They are designed for wastewater and drainage systems, providing robust and reliable connections.

Product Overview

Cast Iron Pipe Fittings for Wastewater Systems

These cast iron pipe fittings are engineered to provide robust and reliable connections for professional wastewater and drainage systems. Manufactured in strict accordance with EN877 and DIN19522 standards, they ensure consistent quality and performance in demanding infrastructure environments. Each fitting features a specialized red epoxy coating, specifically applied to enhance corrosion resistance and extend the operational lifespan of the piping network.

Technical Standards

Manufacturing Standards	EN877, DIN19522
-------------------------	-----------------

Physical Properties

Surface Finish	Red epoxy coating
Corrosion Resistance	Yes

Applications

Intended Use

- Wastewater systems
- Drainage infrastructure
