

Cast Iron Radiator for Home Heating

This traditional cast iron radiator is designed for efficient heat distribution and a classic aesthetic. Constructed from durable cast iron, this radiator provides excellent thermal mass, retaining heat for extended periods.

Product Overview

Classic Thermal Efficiency

This traditional cast iron radiator is engineered for superior heat distribution and a timeless aesthetic. Constructed from durable cast iron, it offers excellent thermal mass, ensuring that heat is retained and radiated for extended periods. Its multi-column design maximizes surface area, promoting optimal heat transfer for both residential and commercial environments.

Technical Details

Design Style

Traditional • Multi-column • Classic

Material

Cast Iron

Installation

Standard connection size for easy installation

Performance

Key Benefits

- Excellent thermal mass
- Extended heat retention
- Optimal heat transfer
- Consistent heating performance

Suitable Environments

Residential, Commercial
