

Cast Iron Sewage Pump with Float Switch

This sewage pump is designed for demanding wastewater applications. It features a cast iron housing and impeller, a float switch for automatic operation, and a solids-handling impeller.

Product Overview

Robust Wastewater Management

The XA series sewage pump is engineered for demanding wastewater applications in residential, commercial, and industrial settings. Constructed with a heavy-duty cast iron housing and impeller, it ensures reliable operation in harsh environments. The integrated float switch provides seamless automatic operation, while the solids-handling design prevents clogging during effluent transfer and sump drainage.

Technical Specifications

Housing Material	Cast Iron
Impeller Material	Cast Iron
Operation Mode	Automatic with Float Switch
Common Applications	Residential Sewage, Commercial Wastewater, Industrial Effluent, Sump Drainage

Features

Performance Features

- Solids-handling impeller technology
- Automatic float switch activation
- High-efficiency motor
- Anti-clogging design
