

Cast Iron Square Gate Valve

This cast iron square gate valve is engineered for controlling flow in various systems. The durable cast iron construction ensures reliable performance and resistance to corrosion.

Product Overview

ZMQF Cast Iron Square Gate

The ZMQF type cast iron square gate is engineered for precision flow control in demanding environments. Constructed from robust, high-durability cast iron, this unit provides exceptional corrosion resistance and long-term reliability. Its unique square configuration facilitates efficient sealing and accurate regulation, making it an ideal choice for water treatment plants, complex irrigation systems, and various industrial fluid management processes.

Technical Specifications

Material	Cast Iron
Gate Shape	Square

Applications

Primary Applications	Water Treatment, Irrigation Systems, Industrial Flow Control
----------------------	--

Key Features

Performance Highlights

- Corrosion resistant construction
- High-durability cast iron frame
- Precision sealing geometry
- Reliable flow regulation
