

Cast Iron Swivel Base Vise

This vise is made from high-quality cast iron for durability and rigidity. It features hardened steel jaws, a smooth-running spindle, and a swivel base for optimal positioning.

Overview

Professional Grade Swivel Base Vise

The Cast Iron Swivel Base Vise is a robust and versatile tool engineered for secure clamping during machining, woodworking, and assembly operations. Constructed from high-quality cast iron, this vise delivers exceptional durability and rigidity to minimize vibration for precise results. It features a smooth-running spindle with a precision-cut Acme thread for effortless clamping force, making it an essential addition to any professional workshop.

Construction & Design

Material	High-quality cast iron
Jaw Material	Hardened steel
Rotation	360 degrees

Features

Ideal For

- Machining
- Woodworking
- Metalworking
- Assembly Operations

Key Features

Swivel Base, Acme Thread Spindle, Integrated Anvil, Hardened Steel Jaws
