

# Cast Iron Water Pump Body

This cast iron water pump body is suitable for industrial and agricultural applications. It is precision-machined to ensure optimal hydraulic performance and longevity.

## Product Overview

### Industrial Cast Iron Pump Housing

This cast iron water pump body is engineered for high-performance industrial and agricultural fluid management. Precision-machined for optimal hydraulic efficiency, it features a smooth interior to minimize flow friction. The robust construction includes integrated mounting points and flanged connections for secure installation and long-term durability in various liquid transport applications.

## Technical Specifications

Material	Cast Iron
Part Number	31170

## Design Features

### Design Highlights

- Precision-machined internal casing
- Minimized internal friction for flow efficiency
- Integrated mounting points for alignment
- Compatible with various impeller and seal materials

Connection Type	Flanged Inlet/Outlet
Suitable Applications	Industrial, Agricultural, Water Transport, Chemical Handling, Slurry Handling
