Product Overview

Robust DTM-15 Cast Iron Water Pump

The DTM-15 water pump is a high-performance solution designed for reliable water transfer in residential, light commercial, and industrial settings. Built with durable cast iron, this pump offers excellent corrosion resistance and longevity for consistent operation. Its compact, quiet design ensures easy installation in confined spaces while providing the power needed for irrigation, HVAC systems, and general circulation.

Features

- Corrosion-resistant cast iron construction
- Compact design for confined spaces
- Quiet operational performance
- Easy installation process
- Durable for long-lasting performance

Material

Cast Iron

Primary Applications

Water Transfer, Irrigation, HVAC Systems, Industrial Processes, Pressure Boosting
