

Cast Iron Y-Branch Pipe Fitting

This cast iron pipe fitting conforms to EN877 and DIN19522 standards. It is designed for drain, waste, and vent (DWV) applications and features a Y-branch configuration for connecting pipes at an angle.

Overview

Cast Iron Y-Branch Pipe Fitting

This Y-branch pipe fitting is engineered for drain, waste, and vent (DWV) applications, providing a reliable solution for complex piping layouts. Built to meet EN877 and DIN19522 standards, it ensures compatibility and performance in professional soil and waste systems. The component features a durable red epoxy coating, specifically applied to enhance corrosion resistance and extend service life in demanding environments.

Technical Standards

Compliance Standards	EN877, DIN19522
Nominal Diameter	100 DN

Physical Properties

Material	Cast Iron
Surface Coating	Red Epoxy

Application

Primary Application

- Drain Systems
- Waste Systems
- Vent Systems
