

Cast Metal Plate with Central Hub

These cast metal plates feature a central hub with a keyway. The plates incorporate evenly spaced mounting holes around the perimeter and a machined finish.

Product Overview

Cast Metal Plate with Central Hub

This durable cast metal component is engineered for precision and reliability in mechanical power transmission systems. Featuring a central hub with an integrated keyway and multiple perimeter mounting holes, it is designed for secure attachment and efficient torque transfer. The machined finish ensures consistent performance and compatibility with standard industrial assemblies.

Technical Specifications

Typical Applications

- Mechanical power transmission
- Pulley systems
- Flywheel assemblies

Component Type	Cast Metal Plate
Design Features	Central Hub, Keyway, Perimeter Mounting Holes, Machined Finish
