

Cast Steel Bench Vise with Swivel Base

This bench vise is made from cast steel for durability. It features an anvil and a swivel base for flexible positioning.

Product Overview

Heavy-Duty Cast Steel Bench Vise

This heavy-duty bench vise features a robust cast steel construction designed for durability and stability in demanding environments. Equipped with hardened steel jaws and an integrated anvil surface, it provides secure gripping and versatile shaping capabilities. The inclusion of a swivel base allows for precise angle adjustments, making it an ideal tool for professional metalworking, woodworking, and general-purpose clamping applications.
