

Cast Steel Wire Rope Socket for Cranes

This cast steel socket is designed for secure termination of crane ropes. It features a tapered design for optimal load distribution and a precision-machined bore for reliable rope attachment.

Product Overview

High-Performance Crane Socket

This cast steel wire rope socket is engineered for secure and reliable termination of crane ropes in demanding industrial environments. Its tapered design ensures optimal load distribution, while the precision-machined bore facilitates a robust and safe rope attachment. Designed for heavy-duty lifting, this component features clear identification markings for enhanced traceability and quality assurance on the job site.

Technical Specifications

Design Features

- Tapered design for load distribution
- Precision-machined bore
- Traceability markings

Material	Cast Steel
Primary Application	Crane Systems, Heavy-Duty Lifting, Industrial Construction
Identification Code	ø869
Serial Reference	00100
