

CAT 5e RJ45 Network Outlet Module

This CAT 5e RJ45 network outlet module is a connectivity solution for structured cabling systems. It supports Category 5e specifications, ensuring reliable data transmission up to Gigabit Ethernet speeds.

Product Overview

High-Performance Connectivity

This CAT 5e RJ45 Network Outlet Module is a robust connectivity solution engineered for structured cabling systems. It is designed to support reliable data transmission up to Gigabit Ethernet speeds, making it suitable for office networks, home automation, and industrial control systems. The module features intuitive color-coded wiring terminals to ensure accurate termination and simplified installation.

Technical Specifications

Network Category

CAT 5e

Wiring Standards

- T568A
- T568B

Connector Interface

RJ45

Features

Installation Features

Color-coded terminals, Simplified termination, Error reduction

Construction

Robust, high-durability design for demanding network environments
