

CAT 5e Unshielded Twisted Pair Patch Cord

This high-performance CAT 5e UTP patch cord ensures reliable data transmission. It is constructed with a PC crystal head and gradient one-piece injection molding for firm, reliable connections.

Overview

High-Performance Networking Solution

This CAT 5e unshielded twisted pair (UTP) patch cord is designed for reliable data transmission in modern Ethernet networks. Featuring high-quality RJ45 connectors with gold-plated contacts, it ensures robust connectivity for computers, routers, switches, and other network peripherals. Built for durability and flexibility, this cable supports data transfer rates up to 1 Gigabit Ethernet, making it an ideal choice for office, data center, and home environments.

Technical Specifications

Connector Type	RJ-45
Contact Plating	Gold-plated metal
Plug-in Cycles	750
Jacket Material	PVC with LSZH version available

Compliance & Standards

Certifications	RoHS, REACH
