Product Overview

Professional Ethernet Connectivity

This single LAN power outlet is engineered for reliable CAT5E and CAT6 network connectivity in residential, commercial, and industrial environments. Featuring a classic, aesthetic design, it is built with fire-retardant PC materials that pass stringent high-temperature safety tests. The unit is optimized for easy installation and maintenance, offering excellent anti-interference signal protection for stable data transmission.

Technical Specifications

Temperature Resistance

850 °C

Heat Test Rating

Supported Cables

CAT5E, CAT6, STP, UTP

Material Rating

Fire-retardant and flame-retardant PC housing

Compliance & Trade

Certifications

VDE • CE • ROHS

Payment Terms

- T/T
- L/C

Minimum Order Quantity

3000 pcs
