Product Overview

High-Performance CAT6 Networking Solution

This high-performance CAT6 LAN cable is engineered for reliable data transmission in indoor networking environments, including homes, offices, and data centers. Available in both FTP and SFTP shielded configurations, it provides superior protection against electromagnetic interference and crosstalk. Designed to support Gigabit Ethernet speeds, this cable is an ideal choice for demanding data, voice, and video applications.

Technical Specifications

Key Features

- Twisted pair conductors for reduced crosstalk
- Enhanced protection against electromagnetic interference
- Supports Gigabit Ethernet speeds
- High-quality material construction

Cable Category	CAT6
Shielding Types	FTP, SFTP
Environment	Indoor

Applications

Primary Applications

Data Transmission • Voice • Video • Networking

Deployment Environments

- Residential Networking
- Office Infrastructure
- Industrial Environments
- Data Centers
