

CAT6 Network Patch Panel

This high-density CAT6 patch panel is designed for structured cabling systems. It provides a central point for connecting network cables, ensuring reliable and organized network infrastructure.

Product Overview

High-Density Connectivity Solution

This high-density CAT6 patch panel is engineered for robust structured cabling systems, providing a centralized and organized point for network connections. Designed for reliability, it ensures seamless integration within data centers, server rooms, and professional office network environments. The unit features standard RJ45 compatibility and a durable construction to support long-term infrastructure stability.

Technical Specifications

Number of Ports	24
Cable Compatibility	CAT6, CAT5E
Shielding	UTP (Unshielded Twisted Pair)
Connector Interface	RJ45

Features

Key Features

- High-density design
- Clearly labeled ports
- Robust construction
- Standardized rack mounting
