

CAT6A Ethernet Patch Cord

This CAT6A patch cord is designed for demanding network environments. The cable ensures reliable data transmission and supports speeds up to 10 Gigabit Ethernet.

Product Overview

High-Performance Networking Solution

This Super Cat 6A Ethernet patch cord is engineered for demanding network environments, offering an enhanced version of standard Cat 6 cabling. Compliant with ANSI/TIA-568C.2 and ISO/IEC 11801 Class EA standards, it is specifically designed to support high-bandwidth applications. With a transmission frequency of 500MHz and speeds reaching 10Gbps, this cable provides superior signal integrity and reduced external crosstalk for reliable data center and enterprise network performance.

Technical Specifications

Max Transmission Speed

10 Gbps
Speed

Transmission Frequency: 500 MHz

Cable Diameter: 6.5 mm

Compliance & Standards

Standards Compliance: ANSI/TIA-568C.2, ISO/IEC 11801, Class EA

Features

Key Features

- 10 Gigabit Ethernet support
- Reduced external crosstalk
- Gold-plated connector contacts
- Shielded connectors for signal integrity
- High-durability construction

Applications

Recommended Applications

Data Centers • Enterprise Networks • High-Bandwidth Communications
