

Catalytic System Cleaner Fuel Additive

This high-performance fuel additive cleans catalytic systems and purifies tail gas. It improves octane rating, facilitates carbon removal, enhances power, and reduces fuel consumption.

Product Overview

High-Performance Catalytic System Cleaner

This powerful, water-based cleaning agent is designed to effectively remove carbon deposits, sulfur, and phosphorus complexes from the surface of catalytic converters. By restoring optimal exhaust flow, it helps reduce CO, HC, and NOx emissions while simultaneously restoring engine power and performance. The formula is safe for use with catalytic converters and oxygen sensors, ensuring maintenance without causing damage.

Technical Specifications

Available Capacities

- 475ml
- 550ml

Container Material

Iron

Can Dimensions

65mm x 195mm

Valve Type

Normal/360° Valve

Benefits & Features

Safety & Compatibility

Oxygen Sensor Safe • Catalytic Converter Safe • Water-based Formula

Primary Benefits

Carbon Removal, Emission Reduction, Power Restoration, Ternary Protection, Fuel Consumption Reduction

Certifications

Quality Standards

ISO 9001, ISO 14001
