

# Category 5e UTP Ethernet Cable

Unshielded twisted pair cable designed for data transmission in networking applications. It features four twisted pairs of copper conductors, each with solid polyethylene insulation and a gray PVC jacket.

## Product Overview

### High-Performance Networking Solution

This Category 5e UTP Ethernet cable is engineered for reliable data transmission in modern networking environments. Featuring four twisted pairs of copper conductors with solid polyethylene insulation, it ensures stable connectivity for Ethernet, Fast Ethernet, and Gigabit Ethernet applications. Encased in a durable gray PVC jacket, this cable offers the flexibility and protection required for structured cabling systems in offices and data centers.

## Technical Specifications

### Category

Cat 5e

### Max Data Rate

**1 Gbps**

Data Rate

### Cable Type

Unshielded Twisted Pair (UTP)

## Construction

### Conductor Configuration

4 twisted pairs

### Insulation Material

Solid Polyethylene

### Jacket Material

PVC

### Jacket Color

Gray

## Applications

### Common Applications

- Ethernet
- Fast Ethernet
- Gigabit Ethernet
- Structured Cabling Systems
- Network Device Interconnection
