

Cathode Ray Tube Television

This is a cathode ray tube (CRT) television with a black plastic casing and white bezel. The unit features control buttons and ventilation grills.

Product Overview

Legacy CRT Television Display

This cathode ray tube (CRT) television offers a reliable, legacy display technology favored for its deep black levels and distinct visual character. Housed in a durable black plastic casing with a contrasting white bezel, the unit is designed for functional simplicity. It includes integrated front-facing control buttons and side ventilation for efficient thermal management.
