

Cathode Ray Tube Television

This is a cathode ray tube (CRT) television with a silver plastic housing. The TV features a standard 4:3 aspect ratio screen and front-panel controls.

Product Overview

Classic Cathode Ray Tube Television

This classic cathode ray tube (CRT) television offers a traditional viewing experience characterized by deep black levels and exceptionally fast response times. Featuring a durable silver-colored plastic housing, it maintains a standard 4:3 aspect ratio suitable for legacy media playback and retro-gaming setups. Its front-facing control panel allows for direct tactile interaction, making it a reliable choice for professional environments requiring authentic CRT display performance.
