

Cathode Ray Tube Television with 4:3 Aspect Ratio

This is a 29 series television. It utilizes cathode ray tube technology to display images on a 4:3 aspect ratio screen.

Product Overview

Traditional CRT Display

This cathode ray tube (CRT) television provides a classic viewing experience with a traditional 4:3 aspect ratio. It features integrated speakers on both sides for localized audio delivery and a robust chassis design. This display solution is ideal for applications requiring standard definition performance and legacy compatibility.
