

# Cathode Ray Tube Television with Integrated Speakers

This is a cathode ray tube television with integrated speakers on either side of the screen. It features a prominent power button on the lower front panel.

## Product Overview

### Professional CRT Display Solution

This cathode ray tube television combines classic display technology with functional design, featuring integrated speakers on either side for an all-in-one audiovisual experience. The unit is encased in a durable black frame with red accents, offering a distinctive aesthetic suitable for specific industrial or legacy-compatible applications. Equipped with a prominent, easy-to-access power button on the front panel, this display ensures reliable operation for professional environments requiring traditional analog display capabilities.
