Product Overview

Integrated Surveillance Cabling

This composite cable is engineered specifically for CCTV camera systems, combining network and power transmission into a single, streamlined solution. Featuring twisted pair conductors for reliable data connectivity alongside dedicated power lines, it simplifies installation and improves cable management. The robust outer jacket provides essential durability and weather resistance, making it suitable for both indoor and outdoor surveillance environments.

Technical Specifications

Key Features

- Integrated data and power transmission
- Twisted pair data conductors
- Weather-resistant outer jacket
- Suitable for indoor and outdoor use

Installation Environment

Indoor • Outdoor

Cable Type

Composite Network and Power Cable

Primary Application

CCTV Systems, Surveillance, Security Networking
