Product Overview

Professional Safety Footwear

These safety shoes are engineered to meet rigorous CE EN 20345:2011 standards, providing essential protection for industrial and construction environments. Designed for durability and comfort, they feature a high-quality cowhide split leather upper and a robust steel toe cap capable of withstanding 200 joules of impact. With an S3 safety rating, these shoes offer comprehensive protection including anti-static properties, energy-absorbing heels, and puncture-resistant soles for demanding work conditions.
