Overview

Professional Welding Protection

This CE EN175 certified welding helmet is engineered for reliable eye and face protection during demanding welding operations. Featuring a durable construction with a lift-front lens holder, it allows for seamless transitions between welding tasks and workpiece inspection without removing the helmet. Designed for versatility and comfort, it is an essential tool for gas welding, brazing, and torch cutting applications.

Technical Specifications

Lens Size

108 mm
Width

51 mm
Height

Materials

ABS Bracket, Polypropylene (PP)

Lens Configuration

Lift-front lens holder

Compliance & Usage

Safety Standards

CE EN175

Recommended Applications

- Gas welding
- Brazing
- Torch cutting

Compatibility

Designed to fit most regular safety helmets
