

Ceiling Cassette Air Conditioning Unit

This ceiling-mounted cassette air conditioning unit is suitable for commercial or residential use. It features a four-way airflow pattern for even temperature distribution and includes a washable air filter.

Product Overview

Professional Climate Control Solution

This ceiling-mounted cassette air conditioning unit offers an efficient and discreet climate control solution for both commercial and residential spaces. Engineered with a compact design, it integrates seamlessly into standard ceiling grid systems. The unit features advanced four-way airflow technology to ensure even temperature distribution throughout the room, while the included washable air filter helps maintain optimal indoor air quality.
