

Ceiling Fan with Exhaust

This ceiling fan provides air circulation and exhaust capabilities. It features a brushed metal finish and translucent blades.

Product Overview

Dual-Function Air Management

This versatile ceiling fan is engineered for indoor environments requiring both effective air circulation and exhaust ventilation. Featuring a durable brushed metal finish on the motor housing and blade arms, it offers a professional aesthetic suitable for various commercial or residential settings. The unit utilizes three lightweight, translucent blades designed to optimize airflow while maintaining a sleek, modern profile.
