

Ceiling Mount PIR Motion Sensor with Neon Indicator

This ceiling-mounted passive infrared (PIR) sensor is designed for motion detection. It is suitable for use in indoor residential or commercial settings and includes a neon indicator for status updates.

Product Overview

Efficient Motion Detection for Smart Spaces

This Ceiling Mount PIR Motion Sensor is a professional-grade solution for automated lighting and security management. Featuring a high-sensitivity Passive Infrared lens and a built-in neon status indicator, it provides reliable occupancy sensing for both residential and commercial environments. Its circular, low-profile design ensures seamless integration into modern interiors while promoting significant energy savings.

Core Features

Detection Technology

Passive Infrared (PIR) • Motion Sensing • Occupancy Detection

Status Indicator

Integrated Neon Indicator

Design & Installation

Mounting Type

Ceiling Mount

Design

Circular with Central Sensor Lens

Applications

Primary Functions

- Automated Lighting Control
- Security System Integration
- Energy Efficiency Optimization

Environment

Indoor, Residential, Commercial

Performance

Performance Highlights

360 °

Detection Angle
