Product Overview

Advanced Photoelectric Safety

This ceiling-mounted photoelectric smoke detector is engineered to provide early warning fire detection for residential and commercial spaces. Upon smoke detection, it immediately triggers an output signal to connected safety systems, helping to minimize potential losses. Designed for reliability and ease of use, it serves as a critical component for fire safety infrastructure.

Technical Specifications

Performance Data

60 μ A

Static Current

38 mA

Working Current

Power Supply

DC12V to DC24V

Operating Temperature

-10°C to 40°C

Design and Installation

Key Features

- Photoelectric sensing technology
- Visible LED indicator
- Immediate signal output
- White plastic housing

Mounting

Ceiling Mount, Fixed Installation
