

Ceiling Mounted Air Curtain

The ceiling-mounted air curtain creates an invisible barrier of air to separate environments, preventing the entry of dust, insects, and pollutants while maintaining a consistent temperature. Ideal for commercial and industrial applications, this unit ensures energy efficiency by reducing heat loss or gain, improving indoor air quality, and enhancing customer comfort.

Overview

Professional Climate Control Solution

The ceiling-mounted air curtain is engineered to create a powerful, invisible air barrier that effectively separates indoor and outdoor environments. By preventing the ingress of dust, insects, and pollutants, it maintains a consistent internal temperature and significantly improves indoor air quality. Designed for seamless integration into commercial and industrial ceilings, this unit provides unobtrusive climate control while maximizing energy efficiency by minimizing heat loss or gain.

Key Features

Key Benefits

- Prevents entry of dust and insects
- Maintains consistent indoor temperature
- Reduces energy consumption
- Improves indoor air quality
- Unobtrusive ceiling-mounted design

Suitable Applications

Commercial, Industrial

Performance

Installation Method

Ceiling Mounted
