

Ceiling Mounted Bathroom Heater with Ventilation Fan

This ceiling-mounted bathroom heater provides warmth and ventilation. It features four heat lamps arranged around a central fan for efficient heating and moisture removal.

Product Overview

Integrated Climate Control

This ceiling-mounted bathroom heater combines rapid warmth with efficient ventilation, creating a comfortable environment in residential or commercial bathrooms. Featuring a four-lamp infrared heating system, it provides immediate heat, while the central integrated fan effectively manages moisture and improves air circulation. Its durable metallic housing and grid-based design ensure safety and longevity in high-humidity settings.

Technical Specifications

Integrated Features

- Heat lamps
- Ventilation fan
- Metallic housing

Installation Type	Ceiling Mounted
Heating Method	Infrared, Halogen
Lamp Configuration	4

Key Performance Metrics

Primary Functions

Heating • Ventilation • Moisture Removal
