

Ceiling-Mounted Cassette Air Conditioning Unit

This ceiling-mounted cassette air conditioning unit is designed for commercial or industrial applications. It features adjustable louvers for multi-directional airflow and is designed for integration into suspended ceiling systems.

Product Overview

Professional Climate Control Solution

This ceiling-mounted cassette air conditioning unit is engineered for seamless integration into suspended ceiling systems in commercial and industrial settings. It features a sophisticated square panel with adjustable louvers, facilitating multi-directional airflow for consistent climate management. Designed for environments requiring precise temperature control, it utilizes an advanced heat exchanger and dedicated refrigerant lines to deliver efficient cooling and ventilation.

Technical Specifications

Design Type	Ceiling-mounted cassette
Mounting Compatibility	Suspended ceiling systems
Airflow Features	Multi-directional, Adjustable louvers

Application Suitability

Recommended Use

- Commercial spaces
- Industrial facilities
- Areas requiring precise climate control
