

Ceiling-Mounted Infrared Bathroom Heater with Ventilation

This ceiling-mounted heater uses infrared lamps to quickly warm bathroom spaces. It also features a central ventilation fan for added comfort.

Product Overview

High-Efficiency Bathroom Heating Solution

This ceiling-mounted infrared bathroom heater is engineered for rapid and efficient climate control in residential bathroom environments. Combining powerful infrared heating lamps with a central ventilation fan, it provides an all-in-one solution for warmth and air circulation. Built with durable, heat-resistant materials, this unit ensures reliable operation and energy-saving performance.
