

Ceiling Mounted Split Air Conditioner

This split air conditioner features a ceiling-mounted indoor unit. It also includes an external component for heat exchange.

Product Overview

High-Efficiency Climate Control

This ceiling-mounted split air conditioner is engineered for professional environments requiring discreet and efficient climate management. Designed for seamless integration into ceiling spaces, the system provides powerful cooling and heating capabilities while maintaining a low profile. It is an ideal solution for commercial offices, retail spaces, and conference rooms where floor space is at a premium and aesthetics are paramount.
