

# Ceiling Mounted Ventilation Fan

This ceiling mounted ventilation fan features energy saving, high efficiency, and low temperature rise. It is designed for efficient air extraction in enclosed spaces.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Ventilation Solution

This ceiling-mounted ventilation fan is engineered with a high-performance, all-copper AC motor designed for energy efficiency and low temperature operation. It features an advanced high-pressure multi-blade impeller housed within an integrated metal box, ensuring ultra-quiet performance and an extended air supply distance. Ideal for bathrooms, kitchens, and enclosed spaces, this unit provides effective removal of moisture, odors, and pollutants.

## Technical Specifications

Motor Type	All-copper AC motor
Impeller Design	High-pressure multi-blade
Construction	Integrated metal box

## Performance Highlights

### Key Performance Metrics

**1 High**

Efficiency

**1 Ultra-Quiet**

Operation

## Certifications

### Certifications

CE • CB

## Applications

### Suitable Environments

- Bathrooms
- Kitchens
- Enclosed spaces requiring ventilation
