

Cellophane Overwrapping Machine

This machine overwraps products in cellophane or similar transparent films. It provides a tamper-evident seal while enhancing the product's presentation.

Product Overview

Three-Dimensional Transparent Film Packaging Solution

This overwrapping machine is engineered for the high-quality application of cellophane or transparent film to rectangular and square-shaped items. By providing a secure, tamper-evident seal, it significantly enhances product presentation and shelf appeal. The robust construction ensures long-term operational reliability, while adjustable parameters allow for versatility across various product dimensions and film types.

Key Features

Core Components

- Film feeding mechanism
- Cutting unit
- Sealing unit
- Product conveying system

Operational Benefits

Tamper-evident sealing • Adjustable settings • Robust construction • Versatile application

Suitable Packaging

Boxes, Cartons, Rectangular Items, Square-shaped Items
