

Centerless Bar Peeling Machine (40-500mm)

This centerless bar peeling machine is designed for material with a diameter of 40-500mm. It is also known as a wire bar peeling machine and steel bar straightening machine.

Product Overview

High-Precision Centerless Peeling

This centerless bar peeling machine is engineered for high-precision metal processing with a versatile diameter capacity ranging from 40mm to 500mm. Built upon proven international design standards and continuously improved through modern engineering, the machine offers world-class performance and reliability for specialized steel production. It serves as a core component for facilities focused on high-quality steel bar manufacturing, straightening, and finishing.

Technical Specifications

Working Diameter Range

40 mm

Minimum Diameter

500 mm

Maximum Diameter

Available Lathe Models

- BP-40
- BP-80
- BP-150
- WC-250

Compatible Straightening Models

- JP-15
- JP-50
- JP-80
- JP-150
