

Centerless Peeling Lathe for Wire and Bar

This centerless peeling lathe is designed for processing wire and bar materials. It is also suitable for straightening steel bars and burnishing wire rods.

Product Overview

High-Performance Surface Finishing Solution

This centerless peeling lathe is engineered for professional steel bar processing, delivering world-class precision and efficiency. Based on proven international design standards, the machine offers reliable performance for specialized steel manufacturing. Its robust architecture is specifically designed to meet the rigorous demands of industrial metal finishing and surface treatment applications.

Machine Models

Available Peeling Lathe Models

- BP-40
- BP-80
- BP-150
- WC-250

Available Straightening Calender Models

- JP-15
- JP-50
- JP-80
- JP-150

Capabilities

Core Processing Capabilities

Steel Bar Peeling, Centerless Turning, Steel Bar Straightening, Surface Finishing
