

Centerline Butterfly Valve

This butterfly valve is designed for centerline mounting in industrial applications. It provides reliable flow control for various fluids.

Overview

Centerline Butterfly Valve

This centerline butterfly valve is engineered for reliable flow control in a wide variety of industrial applications. Designed for versatile installation, it supports a broad range of nominal diameters and pressures, making it suitable for mediums ranging from water and air to steam and chemical substances. Its robust construction and customizable material options ensure durability and operational efficiency.

Technical Specifications

Nominal Diameter Range	DN40 - DN1000
Nominal Pressure	PN10 / PN16
Working Temperature	-15°C to +150°C
Suitable Mediums	Fresh Water, Sea Water, Air, Steam, Food, Medicine, Oils, Sewage

Materials

Material Composition

Component	Available Materials
Body	Cast iron, Ductile iron, Aluminum bronze, Stainless steel, Carbon steel
Disc	Ductile iron, Aluminum bronze, Stainless steel, Carbon steel
Stem/Shaft	Stainless steel, Carbon steel
Gasket	EPDM, NBR, VITON, PTFE
