

Central Hot Water System with Intelligent Control

Central hot water system with intelligent control designed for residential use. It provides on-demand hot water for multiple fixtures simultaneously, and is equipped with safety features like overheat protection and leak detection.

System Overview

Intelligent Central Hot Water Solution

This central hot water system utilizes advanced intelligent control technology to provide consistent, on-demand hot water for multiple fixtures. Engineered for high efficiency, the system features precise temperature regulation and a user-friendly interface to maximize energy savings. With robust safety protocols including overheat protection and leak detection, it is a reliable choice for both new residential construction and retrofit projects.

Key Features

Core Advantages

- Intelligent control system
- High-efficiency heat exchanger
- Precise temperature regulation
- Simultaneous multi-fixture support
- Built-in leak detection
- Overheat protection

Installation Compatibility

Residential Use, New Construction, Retrofit Installations
