

Centrifugal Clutch Assembly for Small Engines

This centrifugal clutch assembly is designed for small engines used in go-karts and mini-bikes. It engages upon reaching a specific RPM, transferring power to the drivetrain.

Product Overview

Centrifugal Clutch Assembly

This centrifugal clutch assembly is engineered for small engines, providing reliable power transmission for applications such as go-karts and mini-bikes. Featuring a robust design with integrated sprocket, clutch drum, and durable shoes and springs, it ensures smooth engagement when the engine reaches the required RPM. Built for longevity and performance, this assembly is an essential component for recreational vehicle drivetrains.

Technical Specifications

Assembly Components

- Clutch drum
- Integrated sprocket
- Clutch shoes
- Springs
- Central hub

Compatible Applications

Go-karts, Mini-bikes, Recreational Vehicles

Performance

Engagement Method

RPM-dependent centrifugal engagement
