

Centrifugal End Suction Water Pump

This centrifugal pump is engineered for diverse industrial and commercial uses. Its durable cast iron build provides resistance to corrosion.

Product Overview

CM Monobloc Centrifugal Pump

The CM Monobloc horizontal centrifugal pump is engineered to strict EN 733 standards, ensuring reliability and performance for professional fluid handling. Designed for versatility, it is an ideal solution for water supply, pressurization, and fire-fighting systems, as well as cooling, heating, and irrigation applications. Its robust construction and end-suction design facilitate efficient operation and simplified installation in both industrial and agricultural environments.

Technical Standards

Design Standard	EN 733
Configuration	Monobloc horizontal
Included Accessories	Counter-flange

Applications

Primary Applications

- Water supply
- Pressurization systems
- Fire-fighting systems
- Cooling and heating systems
- Irrigation
- Industrial applications
- Agricultural applications

Construction & Design

Pump Type	Centrifugal end suction
Body Material	Cast iron
Impeller Material	Cast iron

Performance Features

Fluid Compatibility

Clean water • Low-viscosity fluids

Maintenance	Easy maintenance and servicing design
