

Centrifugal Fluid Transfer Pump with Electric Motor

This centrifugal pump is designed for efficient fluid transfer in industrial applications. It is coupled with a three-phase induction motor and features a robust casing and flanged connections.

Overview

Industrial Fluid Transfer Solution

This horizontally mounted centrifugal pump is engineered for reliable fluid transfer in demanding industrial environments. Equipped with a robust three-phase induction motor, the assembly is designed for continuous, heavy-duty operation. It features a durable casing, secure flanged connections, and a safety-focused coupling guard, making it a versatile choice for handling water, chemicals, and petroleum products.

Technical Specifications

Motor Type	Three-phase induction motor
Mounting Style	Horizontal baseplate mount
Fluid Compatibility	Water, Chemicals, Petroleum Products
Connection Type	Flanged Inlet/Outlet

Safety & Design

Safety Features

Coupling Guard • Robust Casing • Continuous Operation Rated
