

Centrifugal Gasoline Transfer Pump

This centrifugal pump is designed for gasoline transfer. It features a volute casing and sturdy base frame for industrial fluid transfer.

Overview

High-Efficiency Gasoline Transfer Solution

This horizontally mounted centrifugal pump is engineered for reliable fluid transfer in demanding industrial environments. Featuring a robust coupling design and a protective safety guard, it ensures operational stability and longevity. The unit is mounted on a heavy-duty base frame, making it a dependable choice for gasoline and similar fluid handling applications.

Technical Specifications

Primary Applications

- Gasoline Transfer
- Industrial Fluid Handling

Pump Configuration

Horizontal Centrifugal

Design Features

Volute Casing, Coupling Guard, Base-Mounted
