

Centrifugal Impeller Blower Wheel

This is a centrifugal impeller designed for ventilation systems. The blower wheel features curved blades within a housing, designed for mounting on a motor shaft.

Product Overview

High-Efficiency Centrifugal Impeller

This centrifugal impeller blower wheel is engineered for optimal air circulation and ventilation performance. Designed with a durable, circular structure and precisely curved blades, it ensures consistent airflow in both household and industrial exhaust systems. The component features a standardized central mounting hole, allowing for seamless integration onto compatible motor shafts.

Technical Specifications

Component Type

Centrifugal Impeller • Blower Wheel • Exhaust Fan Component

Design Features

- Curved blade geometry
- Enclosed housing design
- Central shaft mounting interface

Material

Plastic

Applications

Primary Applications

Air Circulation, Ventilation Systems, Exhaust Systems
