

Centrifugal Juice Extractor

This centrifugal juice extractor efficiently extracts juice from various fruits and vegetables. It features a powerful motor, a large feeding tube for whole fruits, a stainless steel filter, and a pulp container.

Product Overview

High-Performance Centrifugal Juicer

This powerful 1000W centrifugal juice extractor is designed for efficient processing of whole fruits and vegetables, such as apples, carrots, and pears. Featuring a large 75mm feeding tube and a generous 2.0L pulp container, it minimizes prep time and maximizes output for professional or high-volume environments. The unit includes a stainless steel blade and filter system, ensuring durability and high-quality juice extraction.
