

Centrifugal Juice Extractor

This juice extractor uses a centrifugal system to efficiently extract juice from fruits and vegetables. It features separate containers for juice and pulp and includes a safety locking mechanism.

Overview

Efficient Centrifugal Extraction

This centrifugal juice extractor is designed for high-performance juice extraction from a variety of fruits and vegetables. Featuring a powerful 500W motor and a durable stainless steel grater and filter system, it ensures efficient separation of juice and pulp. With user-friendly controls and robust safety features, it is a reliable appliance for any professional or home kitchen environment.
